DETAILED ACTION

1. Claims 1-26 are presented for examination.
2. It is noted that although the present application does contain line numbers in the specification and claims, the line numbers in the claims do not correspond to the preferred format. The preferred format is to number each line of every claim, with each claim beginning with line 1. For ease of reference by both the Examiner and Applicant, all future correspondence should include the recommended line numbering.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. **Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Adolfsson, US Patent no. 6,092,078.**

5. In re claim 1, Adolfsson shows a method for communicating with a device [3102, 3106, fig 1] selected from the group consisting of programmable logic controllers (PLC) [3106] and I/O devices [3102] in figs 1 and 2, said method comprising the step of:

interconnecting the device to a personal computer (PC) [3104, fig 2] running a web browser [3112]; and

running an application [3112] on the PC that launches the web browser to an initial page and uploads a web browser applet [col 3, line 11] or active x object from the device to the PC via the interconnection [col 3, lines 4-11].

6. In re claim 2, Adolfsson shows electronically communicating data between the PC and the device, under control of the web browser and web browser applet or active x object [3108, fig 1].

7. In re claim 3, Adolfsson shows the PC is in communication with a server on a network [3110, 3112, fig 2] , the interconnection between the device and the personal computer is separate from the network [“The NEIOD can be connected...arranged at one node”, col 3, lines 13-15], and further comprising the step of the PC automatically retrieving data specified by the web browser applet of active x object from the server on the network [col 3, lines 46-50].

8. In re claim 4, Adolfsson shows the data retrieved from the server on the network comprises information about the device [col 3, lines 34-42].

9. In re claim 5, Adolfsson shows displaying the information about the device in a web browser window [col 3, lines 22-29].

10. In re claim 6, Adolfsson shows the data retrieved from the server on the network comprises an executable application, and further comprising the step of executing the executable application [col 3, lines 34-42].

11. In re claim 7, Adolfsson shows downloading the data received from the server to the device [col 3, lines 4-6].

12. In re claim 8, Adolfsson shows transferring data from the device to the server via the web browser [col 3, lines 22-29].

13. In re claim 9, Adolfsson shows the device is electronically coupled to a plurality of intelligent modules [fig 1], and further comprising the step of selectively communicating

Art Unit: 2182

data between the intelligent modules and the server, via the device, the interconnect, the web browser, and the web browser applet or active x object [col 3, lines 13-33].

14. In re claim 10, Adolfsson shows automatically retrieving data specified by the web browser applet or active x object from the PC to the device [col 3, lines 4-6].

15. In re claim 11, Adolfsson shows transferring data from the device to the PC via the web browser [col 3, lines 22-29].

16. In re claim 12, Adolfsson shows the device is electronically coupled to a plurality of intelligent modules, and further comprising the step of selectively communicating data between the intelligent modules and the PC, via the device, the interconnection, the web browser, and the web browser applet or active x object [col 3, lines 13-33; figs 1 and 2].

17. In re claims 13-26, Adolfsson teaches the method steps as set forth in claims 1-

16. Therefore, Adolfsson also teaches the method steps in using the apparatus as set forth in claims 13-26.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.

Recent Statutory Changes to 35 U.S.C. § 102(e)

On November 2, 2002, President Bush signed the 21st Century Department of Justice Appropriations Authorization Act (H.R. 2215) (Pub. L. 107-273, 116 Stat. 1758 (2002)), which further amended 35 U.S.C. § 102(e), as revised by the American Inventors Protection Act of 1999 (AIPA) (Pub. L. 106-113, 113 Stat. 1501 (1999)). The revised provisions in 35 U.S.C. § 102(e) are completely retroactive and effective immediately for all applications being examined or patents being reexamined. Until all of the Office's automated systems are updated to reflect the revised statute, citation to the revised statute in Office actions is provided by this attachment. This attachment also substitutes for any citation of the text of 35 U.S.C. § 102(e), if made, in the attached Office action.

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 in view of the AIPA and H.R. 2215 that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

35 U.S.C. § 102(e), as revised by the AIPA and H.R. 2215, applies to all qualifying references, except when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. For such patents, the prior art date is determined under 35 U.S.C. § 102(e) as it existed prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. § 102(e)).

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 prior to the amendment by the AIPA that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

Art Unit: 2182

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
